

TRAN NGOC DANG KHOA

FRESHER UNITY DEVELOPER

Can Tho, Vietnam | +84 708 520 727 | khoatnd0907@gmail.com | github.com/KhoaCodeBug

Portfolio: khoacodebug.github.io

PROFILE

Completed all coursework and the graduation project in Game Programming at FPT Polytechnic, Can Tho. Seeking a Fresher Unity Developer role with guidance and opportunities to contribute to real products. Ready to learn, act on feedback and improve skills to meet the team's needs and contribute to its work.

TECHNICAL SKILLS

Game programming	C#, Unity 6, OOP, state machines, ScriptableObjects.
AI and multiplayer	A*, NavMesh, behavior trees. Photon Fusion 2: Host Mode, RPCs, state synchronization.
Tools and testing	Git/GitHub, pull requests, debugging, Unity Test Framework, URP, animation and audio.
AI-assisted workflow	Use AI to clarify requirements, plan with Spec Kit and automate tasks. Review changes, develop test cases and verify behavior in Unity before integration.

SELECTED PROJECTS

Fragments of Survival

Since Mar 2026

Team Lead / Unity Developer

Unity 6, C#, Photon Fusion 2, A*

- Four-person graduation project: an isometric survival game with solo and multiplayer modes. Coordinated task assignments, code integration and testing with the team.
- Contributed to checkpoints for saving progress, host authority checks and state synchronization for late-joining players.
- Improved zombie navigation and recovery around tight corners and thin walls. Added tests to catch bugs returning after changes.
- Integrated Fog of War into 2D environments, limiting visibility by sight range and obstacles to support exploration in dark areas.

Project Beat - Mobile Rhythm Game

May 2026 - Aug 2026

Project Manager / Unity Developer

Unity 6, C#, URP

- Coordinated a 21-member team, agreed on development conventions, tracked progress and integrated changes through Git and pull requests.
- Integrated Dypsloom Rhythm Timeline and developed chart import/conversion tools to connect note data with the runtime note-spawning system.
- Contributed to the song-selection flow and hold-note behavior.
